Histo-pathology Lab Equipment's:

Working table for staining:

The working table for staining model (ST-1000) is equipped with air down draft system. This specialized worktable guarantees a laboratory environment free of pollutants while slicing and preparing histological slide preparations, and is even well suited for small dissections. Airflow travels over the entire working area and is vacuumed out downwards, which provides optimal removal of unsanitary vapours.
MAC (maximum allowable concentration) values for formalin are below target throughout the entire vacuum-effected area. The cutting table is to be connected to a side-mounted exhaust system.

The Working tables for staining includes the following features:

- Entire construction is made of stainless steel (Material No. 1.4301 – AISI 304)
- Stable, self-supporting undercarriage with adjustable legs
- Low overall height of the upper structure increases leg room
- Very sturdy, perforated and insertable working plates
- Air speed onto the perforated surface: min. 0,4m/sec
- Integrated sprinkler system with adjustable valve for bath sanitation located underneath the perforated working plates
- Exhaust duct left or right side

Technical Data:

Dimensions W/D/H:	1000 x 750 x 750 mm
Exhaust Air capacity:	600 m³/h
Material:	Stainless steel (Material No. 1.4301 - AISI 304)
Perforated working area:	approx. 840 x 670 mm
Cold / Warm water connection:	½“
Wast water connection:	2“
Exhaust duct diameter:	200 mm
Type:	ST-1000
